

Makefile

	make directories	make dstr	make ray	make tracer
nowpi	✓	✓		✓
bell	✓	✓		✓
li	✓	✓	✓	✓

- make: builds everything
- make dstr: builds to distribute particles, **exec file: dstr**, run to produce distribution.h5
- make ray: builds to interpolate ray, **exec file: ray**, run to produce interpolated_ray.h5
- make tracer: builds to simulate noWPI / WPI, **exec file: tracer**, run to produce nowpi.h5 / both.h5

e.g terminal commands in linux system

```
make && ./dstr && ./ray_int && ./tracer no_wpi li_wpi
python3 Post_Processing_and_Plots
```

Compare noWPI-WPI
